Education

Comsats University Islamabad,PK

Bachelor of Science in Software Engineering   Feb 2018 – Jan 2022

Experience

Junior Flutter developer   Oct 2023 – July 2024

Hamster tech , UK

Core Team   Mar 2023 – Present

Flutteristas , Germany

Flutter internship   May 2023 – Jun 2023

Etech Innovators

Project

- **Moody**   (Flutter, OpenAI, Spotify, Audiomack)

Mood based AI music playlist recommendation app based on the mood and genres selected by the user.This app leverages the power of flutter for the frontend, openAI for intelligent music recommendations, spotify and audiomack for seamless playlist creation and management .

- **Givs**   (Bloc, Mvvm, Firebase)

The app, designed to make a positive impact, incorporates user-friendly interfaces, secure donation processing, and real-time progress tracking for supported causes. Utilized to create an accessible platform aimed at connecting donors with impactful charitable initiatives.

- **Promotions** (Flutter , Firebase)

Developed a feature-rich e-commerce application using Flutter and integrated Firebase for seamless functionality. The app facilitates a smooth shopping experience, incorporating user-friendly navigation, real-time inventory updates, and a secure checkout process.

- **Weather app** (Flutter, Riverpod ,Dio, Geo locator, Rest apis)

Build a functional weather app using REST Api's and Dio package. We will also use Riverpod for state management. This app uses two different Api's for getting weather data openweathermap.org and open-meteo.com.

Technical Skills

Languages: Dart

Mobile Development: Flutter , Clean Architecture , BLoC , Provider , MVVM ,MVC , Hive , FVM, Riverpod , Google Maps , Layered architecture, Feature based architecture .

Tools and Platforms: GitHub (Version control), Jira (Project management), Firebase(Firebase authentication , Firebase Storage , firebase cloudstore), Postman (API testing and development), figma .
